ABOUT RPI

For almost 35 years, Replacement Parts Industries, Inc. (RPI) has provided hospitals with an alternate source for obtaining quality replacement parts for healthcare equipment.

We opened our doors in response to a growing need in the healthcare industry for a source other than the original equipment manufacturer (OEM) to obtain quality replacement parts. But it is the wide selection of parts, excellent customer service, fair prices, and loyal customers that have made RPI the success it is today.

RPI is in the parts business and only the parts business. We focus on one thing, and only one thing ... producing quality parts. We do not make, sell or service equipment. We design and manufacture, or directly source replacement parts for the healthcare industry.

Our quality-engineered parts are manufactured to meet the OEM's performance requirements. Also, RPI's skin temperature probes, heating elements, and phototherapy lamps to fit various infant incubators and warmers have all received FDA 510(k) clearance.

Additionally, RPI is ISO9001 certified to ensure that we maintain strict quality standards. As with our complete line of parts, all probes, heating elements, and lamps are tested by our vendors, and then re-inspected by RPI to ensure compliance to our own specifications before they are made available to you.

RPI has gained an international reputation for quality parts and unparalleled customer service. Healthcare professionals have come to rely on RPI as the leader in replacement parts.
